PROJECTS

PhoneBook Pro — Full-Stack Contact Management App
[Node.js](#) | [Express.js](#) | [MongoDB](#) | [EJS](#) | [Auth](#)

- 📅 2025
- Built complete web app with user authentication, session management, and CRUD operations
 - Designed MongoDB schema with Mongoose models; implemented role-based access and secure login
 - Structured RESTful API routes with dynamic EJS-based frontend

TalentBridge — Smart Recruitment & Skill Matching Portal

[Node.js](#) | [MongoDB](#) | [Role-Based Auth](#) | [Full-Stack](#)

- 📅 2025
- Developed multi-role recruitment platform with separate employer and job-seeker dashboards
 - Implemented skill-matching algorithm and MongoDB-driven candidate filtering system
 - Designed complete relational-style database schema in MongoDB

Terminal PhoneBook — Python + MongoDB CLI App

[Python](#) | [MongoDB](#) | [PyMongo](#) | [Aggregation Pipelines](#)

- 📅 2025
- Built terminal-based phonebook with colored UI using Python and MongoDB
 - Implemented full CRUD operations and advanced MongoDB aggregation features

Flight Route Management System

[C++](#) | [Graph Data Structures](#) | [Dijkstra's Algorithm](#)

- 📅 2024
- Represented flight routes as weighted graphs; applied shortest-path algorithms
 - Solved real-world transportation optimization using advanced DSA concepts

MY PHILOSOPHY

“Build things that matter, learn things that last, and never stop growing.”
